Total Cost	\$3,650	\$3,200
Yearly Costs:	\$400	\$600

Dive Comparison

Depth	70fsw (EAN32)	70fsw
No Stop Time (recreational)	60 mins	120 mins
Depth (tech)	140fsw (EAN26)	140fsw
Bottom Time (tech)	40 mins	40 mins
Total Run Time (tech):	103 mins	70 mins
Deco Time	63 mins	30 mins

Training is very important with any rebreather. You should seek out a person who routinely uses a rebreather for his/her diving activities. Practical experience is the best instructor for Rebreathers.

Matthew Hahn has been a CCR Instructor for 4 years, a Scuba Instructor for over 10 years, and a Divemaster for over 30 years. He has over 2000 total logged dives and 300 hours of Rebreather Experience to depths of over 240fsw.

Students describe Matthew as a good, patient teacher, but, firm in standards, safety and procedures and just a lot of fun to be with. His enthusiasm and enjoyment for the sport of diving are contagious. You do not “get” certified with Matthew, you learn the topics thoroughly and earn your certification while building confidence to be the best that you are.

During your class you will learn to dive your rebreather in many conditions. Your experience will include academics and theory, unit servicing, introductory dives in confined water (pool) conditions, skill honing and experience in fresh water with final dives conducted in real world conditions on some of the nicest reefs and wrecks in the world.

Please contact Matthew Hahn 314.276.1687, matthew.e.hahn@gmail.com to begin your membership in *The Rebreather Dive Group* and take diving to a new level.
